

13. ELYMNIAS TIMANDRA, n. s.

Like *E. Lais*; outline of wings more dentate, especially on the hind-wings.

Male. Above, like *E. Lais*, but the markings broader, and of a rich verditer blue on the upper-wings; beneath, the base of the wings is much darker.

Female. Wings more elongate; markings pale ochre, tinged with bluish on the upper-wings, the tooth at the outer angle of the hind-wings forming a short tail.

Hab.—Sylhet, Moulmein (Brit. Mus., type).

Very closely allied to *E. Lais*, but the different outline of the wings, and distinct colouring, render it necessary to separate it.
